

How to download the PagePlayer App for “Das Leben A1”

Download the above app onto your mobile phone or tablet (iOS or Android) before your first lecture in the semester. It contains materials (audio, video, exercises etc.) from your textbook for use in class or individually. Do remember to bring your device with the app along with your textbook to each lecture class.

All illustrations below are screenshots from an iOS device.

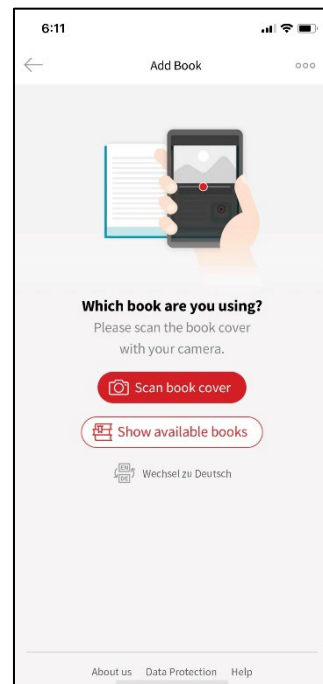

Step 1:

Search for “PagePlayer – Cornelsen” in the iOS App Store or Google Play. Download and install it on your mobile device.

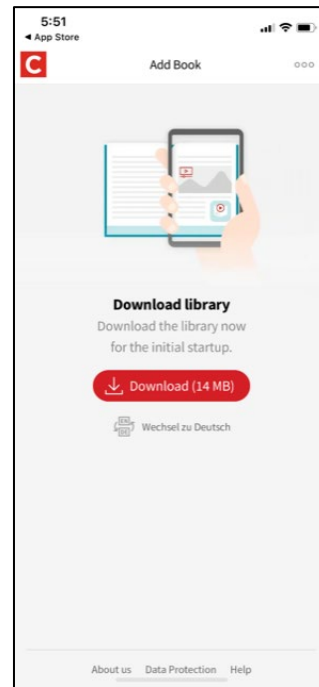

Step 2:

Open the app on your device and download the library for the initial setup. This may take a few minutes.

Step 3:

Select the textbook “Das Leben A1”. You can do this by scanning your book cover or selecting it by tapping on “Show available books”.

Step 4:

Open the downloaded book and you will find the list of contents. For each unit (except for Einheit 0), there is a course book (KB) and a practice (ÜB) section. Ideally, you should download all materials for the book onto your device. Alternatively, you may first download just for Einheit 0 and Einheit 1 KB/ÜB for the first two weeks of the semester.
